-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2838

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 54-76, drawn to a particular method of controlling power drawn from an energy converter to supply a load, classified in class 323, subclass 266.
  - II. Claims 77-106, drawn to a particular structure of an apparatus for controlling an energy transfer device, classified in class 323, subclass 282.
  - III. Claims 107-108, drawn to a particular process of a computer for directing a processor to control an energy transfer device, classified in class 323, subclass 318.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I II and III are related as combination (Group I) and subcombination (Group II and Group III). Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of controlling power drawn from an energy converter to supply a load as claimed in Group I does not necessary to contain a particular processor as claimed in Group II, or a particular computer as claimed in Group III. The subcombination has separate utility such as the apparatus for controlling an energy transfer device as claimed in Group II or the computer for directing a processor to

Art Unit: 2838

control an energy transfer device as claimed in Group III can be used in the change of voltage level at the input power source (whereas the method in Group I is for the present amount of power supplied to a load).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Applicant is suggested to elect one group at a time.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew V. Nguyen whose telephone number is (571) 272-2081.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2800.
